Summary

The Canadian National Fire Database (CNFDB) Fire Point and Polygon Data is a collection of forest fire locations and fire perimeters as provided by Canadian fire management agencies including provinces, territories, and Parks Canada. The forest fire data contained in the CNFDB have a wide range of uses including national scale mapping, statistical and spatial analysis and research involving natural disturbance.

Description

The Canadian National Fire Database (CNFDB) Fire Point and Polygon Data is a collection of forest fire locations and fire perimeters as provided by Canadian fire management agencies including provinces, territories, and Parks Canada.

To create the Canada-wide product, the data collected from each agency are projected into a common format and combined with data from other agencies; attribute fields are standardized; agency specific attribute fields are removed; and polygon areas are calculated using GIS.

Note that the data contained in the CNFDB are not complete nor are they without error. Locations are approximate. Not all fires have been mapped, and data accuracy varies due to different mapping techniques. This collection includes only data that has been contributed by the agencies. Data completeness and quality vary among agencies and between years.

For analyses for a single province or territory or for Parks Canada, we suggest you contact the appropriate agency. Links to the agency web sites can be found <http://cfs.nrcan.gc.ca/ha/nfdb>, or can be found through the Canadian Interagency Forest Fire Centre (CIFFC) website at <http://www.cifc.ca>

The database is a large collaborative effort by all Canadian fire agencies. We thank the many individuals who contributed to this effort, including fire crews, field personnel, photo interpreters, pilots, digitizers, and analysts. Compilation of the Canada-wide database was partially supported by the Canadian government programs of ENFOR (ENergy from the FORest), the Program on Energy Research and Development, the Climate Change Action Fund, and Action Plan 2000.

Please note that an End-User Agreement is required for accessing these data. Please refer to this agreement for information regarding restrictions of use -- http://cfs.nrcan.gc.ca/common/cwfis/End_User_Agreement_EN.html

=====
CNFDB – Agency PointData contains data for the following agencies and years:

BC 1950-2016
AB 1959-2016
SK 1959-2016
MB 1959-2016
ON 1959-2016
QC 1959-2016
NS 1960-2016*
NB 1980-2016*
NL 1955-2016*
YT 1946-2016
NWT 1959-2016
PC 1946-2016
*Missing years

(Note: more details regarding sources and updates under Resource Details-Supplemental Information)

=====
Les données ponctuelles et polygonales de la BNDFFC sont recueillies auprès des agences de gestion des feux de forêt, y compris celles des provinces et territoires et Parcs Canada. Pour obtenir un produit pancanadien, les données recueillies auprès de chaque agence sont projetées dans un format commun et combinées aux données d'autres agences, les champs d'attributs sont normalisés, les champs d'attributs propres à une agence sont supprimés, et la superficie des polygones est calculée à l'aide d'un SIG.

Il est à noter que les données contenues dans la BNDFFC ne sont ni exhaustives ni sans erreur. Tous les feux n'ont pas été cartographiés, et l'exactitude des données varie selon les différentes techniques de cartographie. Cette base de données ne contient que les données fournies par les agences. L'exhaustivité et la qualité des données peuvent varier d'une agence et d'une année à l'autre.

Pour obtenir des analyses à l'égard d'une province ou d'un territoire unique ou de Parcs Canada, communiquez avec l'agence responsable appropriée. Les liens aux sites Web des agences sont disponibles via le [Centre interservices des feux de forêt du Canada \(CIFFC\)](#).

Cette base de données est le fruit d'un travail de collaboration entre tous les organismes de lutte contre les incendies du Canada. Nous remercions tous ceux qui ont contribué au projet, notamment les équipes de pompiers, le personnel de terrain, le personnel de photo-interprétation, les pilotes, les responsables de la numérisation et les analystes. Le travail de compilation de cette base de données à l'échelle canadienne est appuyé par les programmes canadiens ENFOR (Programme de l'énergie forestière) et PERD (Programme de recherche et développement énergétique) et par le Fonds d'action sur le changement climatique et le Plan d'action 2000.

Veuillez noter que vous devez accepter les conditions de l'Entente d'utilisation de la Base nationale de données sur les feux de forêt pour pouvoir accéder aux données. Cliquez sur le lien suivant pour consulter le texte de cette entente et connaître les restrictions concernant l'utilisation des données http://cfs.nrcan.gc.ca/common/cwfis/End_User_Agreement_FR.html

SUPPLEMENTAL INFORMATION

Version notes regarding data updates and sources:

BC:

- BC fire data updates downloaded from DataBC website <https://data.gov.bc.ca>;
- This version includes BC points for 1930-2016, Entire dataset was updated with source data in this version;
- Only records included where FIRE_TYPE = "fire" in source data
- The BC fire data is published by the BC Ministry of Forests, Lands and Natural Resource Operations - BC Wildfire Service

Licensed under Open Government License - British Columbia -- <http://www2.gov.bc.ca/gov/content/governments/about-the-bc-government/databc/open-data/open-government-license-bc>

AB:

- AB fire data updates obtained from Alberta Agriculture and Forestry
- This version includes AB points for 1959-2016, This version includes updates for 1996-2016 to address date/year issues in previous versions,

SK:

- SK fire data updates provided by agency;
- This version of NFDB poly includes SK points for 1959-2016, 2016 updates added in this update;

MB:

- MB fire data updates obtained from Manitoba Conservation Fire Program;
- This version of NFDB poly includes MB points for 1959-2016, 2016 updates added in this update

ON:

- ON fire data updates downloaded from Ontario LIO website <https://www.javacoeapp.lrc.gov.on.ca/geonetwork/srv/en/main.home>
- This version of NFDB poly includes ON points for 1959-2016, 2016 updates added in this update;
- Note that for Ontario, fire point data is provided for fires < 40 ha. CFS has generated/included point data for for Ontario fires > 40 ha using the centroid of the provided fire polygon data.
- Note that the Ontario fire data has been produced by Natural Resources Canada under Licence with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

QC:

- QC fire data updates downloaded from <https://www.donneesquebec.ca>
- This version of NFDB poly includes QC points for 1959-2016, 2016 updates added in this update.
- Also data for 2001-2007 has been updated in this version.
- The Quebec open data licence agreement is available here <https://www.donneesquebec.ca/fr/licence/#cc-by>

NS:

- NS fire data updates provided by agency;
- This version of NFDB points includes NS points for 1960-2015, 2016 updates added in this version
- Additional 2016 fire locations have been extracted from polygon data centroid

NB:

- NB fire data updates provided by agency;
- This version of NFDB points includes NB points for 1960-2016, 2016 updates added in this version

NL:

- NL fire data updates provided by agency;
- This version of NFDB includes NL points for 1955-2016
- 2015 and 2016 updates added in this version

PEI:

- There is no data for PEI in the NFDB

YT:

- YT fire data updates downloaded from Yukon Wildland Fire Management website <http://www.community.gov.yk.ca/firemanagement/wfarchives.html>
- This version of NFDB poly includes YT points for 1946-2016, 2016 updates added in this update.

NWT:

- NWT fire data updates provided by agency;
- This version of NFDB poly includes NWT points for 1959-2016, 2016 updates added in this update

PC:

- Parks fire data updates provided by agency;
- This version of NFDB poly includes Parks point data for 1946-2016, 2016 updates added in this update

* PROCESSING ENVIRONMENT Microsoft Windows 7 Version 6.1 (Build 7601) Service Pack 1; ESRI ArcGIS 10.0.5.4400
